PTC Oil Filter Program

Provides Comprehensive Market Coverage

Premium Quality and Performance without the Premium Price

PTC offers a complete line of Oil Filters that provide comprehensive coverage for both domestic and import applications. PTC oil filters are engineered for both conventional and synthetic oils and include cellulose and glass blended media to provide maximum protection.

Why Should You Install PTC Oil Filters?

At highway speeds, as many as 300 gallons of oil pass thru the oil filter every hour. PTC oil filters trap harmful contaminants; keeping the engine running clean and smooth, while extending engine life. Premium quality PTC oil filters provide superior performance and protection that cheaper generic brands simply cannot offer.

KEY FEATURES AND BENEFITS INCLUDE:

- Internally lubricated sealing gasket for easy filter removal
- Spring activated "by-pass relief valve" is pressure sensitive and more responsive. Traditional concave metal strip configurations are heat sensitive and slower to react.
- Dense micro fiber media has more holes to provide better circulation efficiency
- Filter media is metal capped on both ends for added strength and durability
- Internal Coil spring with reinforced Nylon relief valve
- Heavier gauge steel canisters help prevent deformation during installation
- Filters include a secure dust shield, covering the filter opening
- **All PTC part number labels include competitive cross references and UPC codes for your convenience**

PTC has partnered with one of the largest OEM hub assembly manufacturers in China to ensure consistent premium quality in every box. What's in your box?

We've got the right product, right quality & right price to help maximize your sales opportunities.
