## Spindle Hub Assembly Kit Program

Includes Hub Assembly & Proper Bearing to Do the Job Right

**PTC EXCLUSIVE**  
Correct Bearing Included

PTC is pleased to announce their New Spindle Hub Kit program which includes the spindle hub and bearing in one convenient kit.

**Save Time:** Eliminate extra trips to buy the right parts individually or having to return the wrong parts

**Save Money:** Price of the kit cost less than buying the spindle hub and bearing separately

**Do the Job Right:** The bearing usually seizes to the spindle hub and should be replaced as a set

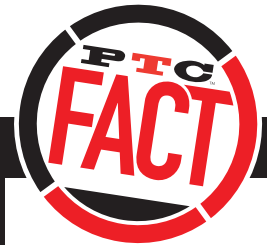

### KEY FEATURES & BENEFITS INCLUDE:

- Proper OE design, fit, form and function
- Comprehensive market coverage, including popular Domestic and Import applications
- Improved dimensional end testing to ensure end play meets OE standards
- Metallurgy testing eliminates metal fatigue
- Correct replacement bearing included
- Import spindle hub repair kits also available

### KITS INCLUDE:

- Wheel Hub Assembly
  - Wheel Bearing
  - Wheel Studs\*
  - Snap Ring\*
  - Axle Nut\*
- \* where applicable

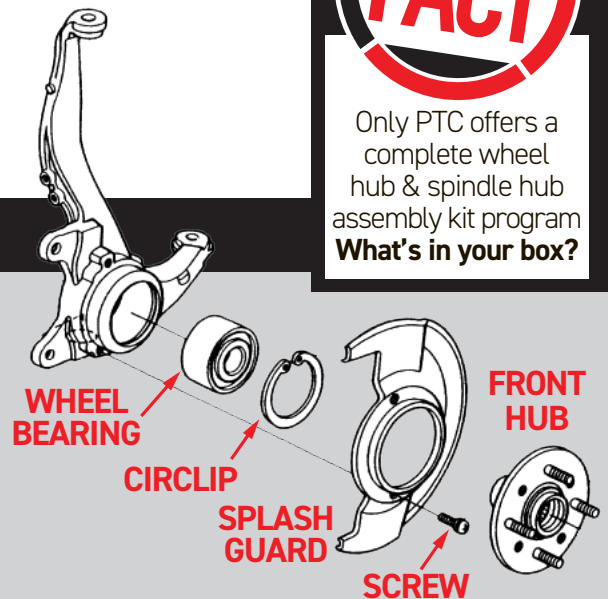

Only PTC offers a complete wheel hub & spindle hub assembly kit program  
**What's in your box?**

## Fix the Cause, Not Just the Symptom

**The Problem:** Many late model import vehicles are designed with a spindle hub assembly that fits inside the wheel bearing verses using a one piece unitized hub bearing assembly. There is over a 30% OE failure rate on spindle hubs, because the bearing race often seizes to the spindle hub and cannot be separated. Also a partially seized bearing can score the spindle hub shaft and negatively impact performance of the replacement bearing.

**The Solution:** Replace both the bearing and the spindle hub assembly to ensure proper OE performance is restored.

We've got the right product, right quality & right price to help maximize your sales opportunities.
